- On **September 9**, R5 received a petition for emergency action under the Safe Drinking Water Act to abate an alleged imminent and substantial endangerment to Benton Harbor, Michigan, residents from lead contamination in drinking water. Since 2019, Michigan EGLE has had an enforcement order in place with the city toward addressing the LCR violations and lead concerns; there is also a water filter program in place through the local health department. The Region is working with OW, OGC, OECA and others to evaluate and respond to the petition.
